

June 17, 2009

Regarding the licensee's request for LIHI re-certification, the Vermont Agency of Natural Resources is of the opinion that the subject project continues to be operated in conformance with the LIHI environmental and recreational criteria. Insofar as we are aware, it is being operated in full compliance with the conditions of the Agency's water quality certification. The licensee continues to cooperatively participate in the Winooski River trap-and-truck operation.

Please contact me if there are any questions.
