

LIHI Certificate #150

At the beginning of June, LIHI was excited to announce Central Rivers Power NH's **Eastman Falls Project** as its 150th Low Impact Certified facility! This run-of-river facility earned a five-year certification starting February 13th, 2019.

LIHI Hosts UNIDO-GEF Delegation

On June 11th, a delegation of Chinese hydro-industry owners, executives, and experts met with the LIHI team to learn about LIHI, its program, and Low Impact Certified hydropower. This diverse group represents the International Center on Small Hydro Power, a non-profit institution operating under the auspices of the United Nations Industrial Development Organization (UNIDO).

The delegation saw four LIHI Certified sites over two days, and hosted a workshop at UMASS Lowell to discuss issues related to small hydropower in China. LIHI gathered industry experts to share their wealth of knowledge with the delegation, topics ranging from fish passage to dam safety. Their insights into the safe, responsible, and clean development of Low Impact Certified hydro were met with much discussion and shared learning throughout.

Good Luck Laura!

We regret to announce that Laura Wisland will be stepping down from her post on the LIHI Governing Board as she moves on from her position with the Union of Concerned Scientists. Laura joined the Governing Board in 2010 and has since provided a wealth of knowledge and support for the organization. Her expertise in energy policy and analysis has been integral to LIHI's success and she will be missed. We thank Laura for

Certificate Holder Benefits Update:

Insurance Program for Low Impact Certified Projects

Learn more about these
Insurance Program Updates and
the Application Process

[With insurance rates rising](#), LIHI is pleased that the London Markets Insurance Program (London Program) is continuing to offer Low Impact Certified Hydropower projects the opportunity to further the value of their LIHI work.

The London Program has determined that LIHI's eight science-based criteria and systematic compliance and high-quality compliance programs reduce the safety, ecological, and business risk of Certified projects when compared to non-certified projects.

The program was recently updated to allow project owners to access the benefit through existing, personal agents.

LIHI does not receive any financial benefit from this program; and transactions are made directly between the certificate holder and CGIS/Price Forbes & Partners. The communication of this opportunity does not constitute or imply the endorsement or recommendation of the London Insurance markets, their services, or their partners, including Commercial Global Insurance Services.

Meet LIHI at HydroVision 2019!

The annual HydroVision International conference "provides a week of informative hydropower focused meetings including perspectives on the role of hydropower and issues affecting hydro resources." Come join LIHI (booth #8085), and thousands of other industry professionals July 23-25 in Portland, Oregon!
