

## 20 Years of LIHI

To commemorate over two decades of LIHI Certification, we want to share our first video. After twenty years, we remain dedicated to encouraging the reduction of impacts from hydropower generation through recognition of hydropower that meets our eight criteria, and opportunities to earn additional revenue through that recognition. We also remain committed to sharing information on hydropower, its benefits, and its impacts with consumers. We hope you enjoy and share the video.

## LIHI Certified Pawtucket, RI Plant to Power Local Schools

We are excited about the Pawtucket Hydroelectric Facility and its new off-takers - seven schools and an industrial arts center. Not only will these schools support local renewable energy, but this agreement includes opportunities to enrich their students' education through tours of the historic site at the Bridge Mill Power Plant in Pawtucket, RI. Read more on the [Providence Business Journal](#).

## Applications Open for Julie Keil Scholarship

LIHI continues to remember and cherish our late Board Chair, Julie Keil, and the important impact she had on the hydropower industry through the [Women in Hydro Scholarship Fund](#). The scholarship aims to fund women enrolled in an accredited college, university, or technical school program majoring in a discipline relevant to entering the hydropower industry. The scholarship will be based on merit and financial need. Applications are due on April 15, 2022.

Visit the [NWA Scholarship page](#) to learn more about Julie, the Scholarship and how to donate.

## See you at Water Week & River Rally!

We are looking forward to attending [Water Week](#) this April and [River Rally](#) this June! Both will be held in Washington DC and offer insightful programming beneficial to any hydro stakeholder. We hope to see you there!
